## **eScripture One Inquiry Printing Agent User Template Settings Release Notes**

## What's New?

DeliverHealth is pleased to announce updates to the InQuery Printing Agent. When previewing and printing from InQuery, user-specific margins and print templates will be applied. The template settings are based on the dictating provider for the job, not the user logged into the printing agent.

This update applies to versions 1 and 2 of the InQuery Printing Agent. Users on version 1 do not need to install a new version. Users on version 2 will be prompted to upgrade to v2.23.

We are still accepting beta users for InQuery Printing Agent Version 2. Contact support today to enroll.

### Minimum Application Requirements

- Operating system: Windows 10 or Higher (64-bit Architecture)
- Web Browser: Chrome, Edge, Firefox
- RAM: 1 GB or higher
- Hard Drive Free Space: 1 GB or higher
