eScription One Mobile for Android v3.5.4

Release Notes

What's New?

DeliverHealth is pleased to announce eScription One Mobile for Android v3.5.4. This version includes updates to prevent duplicate dictations, make attestation template text visible in dark mode, load dictation template text, allow linked accounts to be deleted, as well as several minor bug fixes.

This is a staggered release and will be available to all Android mobile app users in the Google Play store within two weeks.

Minimum Application Requirements

– eScription One Mobile for Android requires an Android operating system that still receives security updates from Android. Android OS 8 or higher is required for eSOne Mobile for Android v3.5.4. As of November 2023, version 9 or higher of the Android operating system will be required.

– Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; stable Wi-Fi with 3 Mbps download/1 Mbps upload or greater is recommended.

– A microphone for dictating is needed.

– Communicates over port 443 to https://mobile.escription-one.com using TLS 1.2.
