**Updates to User Activity Report
and Transcription Volume Report**

Release Notes

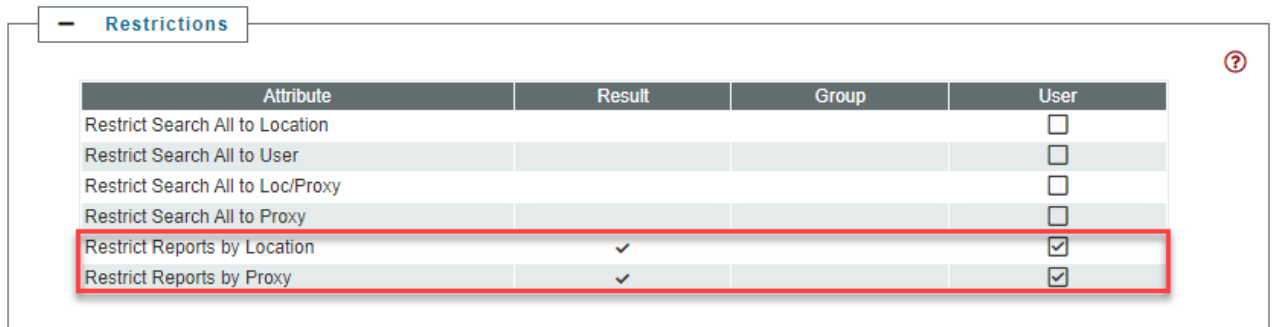

What's New?

DeliverHealth is pleased to announce updates to InQuery's **Transcription Volume** and **User Activity** reports.

Transcription Volume Report

The InQuery Transcription Volume report now adheres to report restriction settings assigned to the user running the report.

Enable report restrictions in Client Maintenance > Users > Edit <user name> > Restrictions, to restrict report data by Location or Proxy. The report data returned will filter out data that the user does not have access to.

Attribute	Result	Group	User
Restrict Search All to Location			<input type="checkbox"/>
Restrict Search All to User			<input type="checkbox"/>
Restrict Search All to Loc/Proxy			<input type="checkbox"/>
Restrict Search All to Proxy			<input type="checkbox"/>
Restrict Reports by Location	✓		<input checked="" type="checkbox"/>
Restrict Reports by Proxy	✓		<input checked="" type="checkbox"/>

User Activity Report

The InQuery User Activity report has been updated to accurately display date and time values in the client's time zone instead of UTC.
