

DeliverHealth

eScripture One Android v3.5.3 Release Notes

What's New?

DeliverHealth is pleased to announce the release of eScription One Mobile for Android version 3.5.3. This version includes enhanced privacy and patient confidentiality by hiding content when switching between apps and preventing screenshots, as well as minor bug fixes.

Enhanced Privacy

To ensure privacy and patient confidentiality, app content will not be displayed when switching between apps. Screenshots will also be prevented when the eSOne Android mobile app is open.

Bug Fixes

- Changed the color of the selection indicator to yellow in Favorite Document Types and Locations to be easier to see in Dark Theme.
- Resolved issues with the date picker resetting or not saving.

Minimum Application Requirements

- eScription One Mobile for Android requires an Android operating system that still receives security updates from Android. As of 6/27/2022, version 10 or higher of the Android operating system is required. Open 'Settings' and tap 'About Phone' then 'Software Information' to confirm that the 'Android Version' or 'Firmware Version' listed is 10 or higher.
- Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; stable Wi-Fi with 3 Mbps download/1 Mbps upload or greater is recommended.
- A microphone for dictating is needed.
- Communicates over port 443 to <https://mobile.escription-one.com> using TLS 1.2.
