# InScribe v7.9

Release Notes

What's new?

DeliverHealth is pleased to announce the release of InScribe v7.9. This release includes several enhancements and bug fixes for an improved user experience.

Longer Field Lengths

The size of numerous user setup fields has been increased to accommodate customer needs.

Solved Issues

– Resolved an issue with the cursor not being focused in the 'Text to find' box when using Find/Replace.

– Fixed an issue with InScribe crashing when deleting space above a table.

– Removed the following incorrect spelling from the default dictionaries: Epididymes.

– Fixed an issue that was causing the Advanced Audio player (Options > Advanced) to throw an error when the playback speed was set to 75%.

Application requirements

– Operating system: Windows 10

– RAM: 4 GB or higher

– Processor: 1 GHz or faster (32 or 64-bit Architecture)

– Browser: IE 11 or higher, Chrome

– Hard Drive Free Space: 1 GB or higher

– .NET Framework 4.7.2 or higher
