# eSOne Printing Agent Updates
Release Notes

What's new?

DeliverHealth is pleased to announce the following updates to the Printing Agent.

## Retain Printing Settings

The Printing Agent has been updated to retain all user print settings between print jobs.

Print settings will be saved during printing agent session.
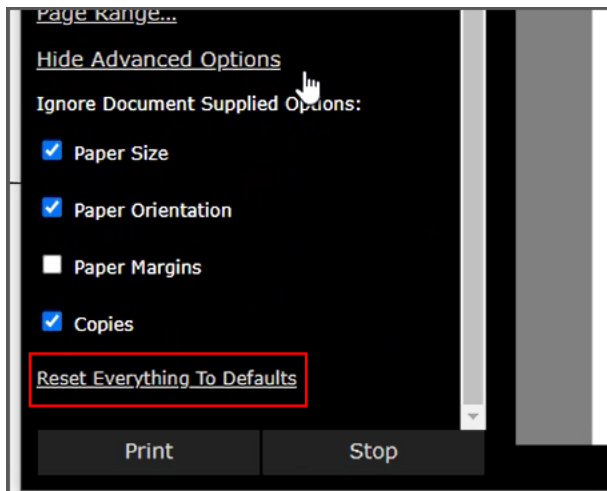

Ignore InCommand Print Settings

A new 'Advanced Options' collapsible menu has been added to the settings panel. This menu contains check boxes for four duplicate print settings found in InCommand. When checked, the default InCommand settings will be ignored, and those values selected for the Printing Agent will be used.

Reset to Defaults

Also under the new Advanced Options menu, a new 'Reset Everything to Defaults' setting allows users to reset printing settings back to the system defaults. The check boxes under 'Advanced Options' will also reset to unchecked.

If you are interested in using the Printing Agent, please contact support at 1-800-858-0080 or eSOne.Support@DeliverHealth.com.

Application Requirements

– Operating system: Windows 10 or Higher
