# eScription One Mobile for iOS v3.34

Release Notes

What's New?

DeliverHealth is pleased to announce the release of eScription One Mobile for iOS v3.34. This release includes an update to hide content when switching between apps and an improved message when there is a network issue. Also included are several minor bug fixes.
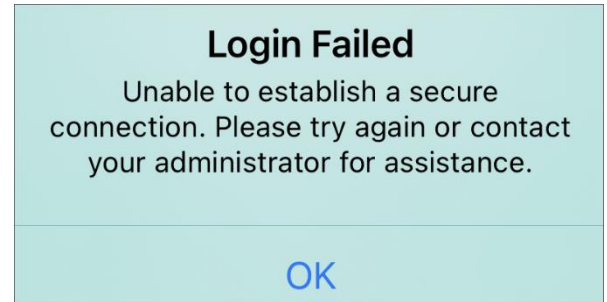

Content Masking

This version offers more enhanced security and confidentiality by hiding content when switching apps or when another task is being performed with the eSOne app in the background. When the eSOne app is maximized and in focus again, the content will be displayed.

Network Issue Message

If any type of network issue or block is encountered during login, a clear message will be displayed.

Login Failed

Unable to establish a secure connection. Please try again or contact your administrator for assistance.

OK

Application Requirements

– Any iOS device with iOS 15.2 or greater. Open 'Settings' and tap 'About' then 'Software Version' to confirm that the OS installed is version 15.2+.

– Internet Access through a wireless Local Area Network (LAN) connection or through a phone service provider. It is strongly recommended to use a Wi-Fi LAN connection when uploading dictations. Minimum bandwidth: LTE/4G data connection; recommended is stable Wi-Fi.

– Communicates over port 443 to https://mobile.escription-one.com using TLS 1.2.
