Inquiry

Removal of Faxes Tab

Release Notes

What's new?

DeliverHealth is pleased to announce an interface change to the InQuery tabs. The Faxes tab has been removed, as it simply redirected users to the neighboring Services tab. Now when managing faxes, users have a single option for navigating: Services tab> Faxes> Manage Faxes.

Faxes tab has been removed:

The screenshot shows the DeliverHealth InQuery interface. The top navigation bar includes 'Home', 'Search All', 'Workflow', 'Problem List', 'Faxes', 'Services', and 'InVision'. The 'Faxes' tab is highlighted with a red box. Below the navigation bar, there are tabs for 'Summary', 'Faxes', 'ShadowPrint', 'ShadowLink', and 'Manage Faxes'. The 'Faxes' tab is selected, and the main content area contains search filters: Recipient Name (text input), Location (dropdown menu with 'Any' selected), Date Faxed (calendar pickers with 'thru' in between), Error Description (dropdown menu with 'Any' selected), Patient ID (text input), and Patient Name (text input).

Use Services tab now:

The screenshot shows the DeliverHealth InQuery interface with the 'Services' tab highlighted in red. The 'Faxes' dropdown menu is open, showing 'Manage Faxes' and 'Pending Faxes' options, both of which are also highlighted with red boxes. The 'Manage Faxes' option is the primary focus. The search filters below are the same as in the previous screenshot: Recipient Name, Location, Date Faxed, Error Description, Patient ID, and Patient Name.

Application requirements

- Operating system: Windows 10
- Web Browser: IE11 or higher, Chrome, Edge, Firefox
- RAM: 1 GB or higher
- Hard Drive Free Space: 1 GB or higher
