## **InCommand InVision Reports**

**Added New Line Count to 'Outsourced From'  
and 'Outsourced To' Reports**

**Release Notes**

## What's new?

DeliverHealth is pleased to announce an update to InCommand's 'Outsourced From' and 'Outsourced To' InVision reports. These changes include a new check box in InCommand that generates additional per line billing count when the Client is set to per minute billing. This additional line count will then be displayed as a new column in the Outsourced reports.

### New 'Enable Outsourced Per Line Count' Option

A new check box named 'Enable Outsourced Per Line Count' has been added to Maintenance> Outsourced Work> Edit Relationship> Rate Information. When enabled, InCommand will generate the Outsourced per line billing count to display in the report, along with the Client's per minute billing line count.

### New Columns in Outsourced Reports

The line count generated from the new 'Enable Outsourced Per Line Count' option above is displayed in two new columns in the 'Outsourced From' and 'Outsourced to' InVision reports:

- Outsourced Lines
- Outsourced Template Lines

**Outsourced From**
